# CYBER SECURITY COURSES

---

*Our courses are offered in  
conjunction with selected  
universities.*

## Cybersecurity for Business Managers and End Users

---

### Course Description

This is an introductory course that will give the candidates a very good cybersecurity non-technical, business-oriented foundation.

### Course Objectives

The objective of this course is to introduce the candidates to the basics concepts of organisational and individual aspects of cybersecurity. This course is also aimed at preparing the candidates for more comprehensive “Cybersecurity Risk Management for Business Managers” course.

### Purpose of Course

Numerous reports show that business managers and leaders, as well as organisational users, are having difficulties to understand, often too technical cybersecurity reports. Hence, this non-technical cybersecurity course is designed to specifically capacitate business managers, C-level executives, organisational board members and non-technical workforce in understanding and addressing cybersecurity issues from their level of responsibility.

## Cybersecurity Risk Management for Business Managers

---

### Course Description

This course is aimed at helping business managers and leaders to understand how to deal with cybersecurity risks as a part of broader organisational risks. The course will be presented in non-technical language with the necessary use of some cybersecurity technical terms.

### Course Objectives

The objective of this course is to introduce the candidates to the cybersecurity risk assessment and management in order to facilitate better coordination and collaboration with the IT and cybersecurity professionals.

### Purpose of Course

Contemporary reports show that business managers and leaders having difficulties to understand, often too technical cybersecurity reports and, consequently, often detrimental cybersecurity risks. Hence, this non-technical cybersecurity risk management course is designed to specifically capacitate business managers, C-level executives and organisational boards in understanding and addressing cybersecurity issues from their level of responsibility.

## Building Cybersecurity Awareness

---

### Course description

Cybersecurity starts with awareness. This course is aimed at helping organisations to develop their own tailor-made cybersecurity awareness programmes

### Course Objectives

The objective of this course is to give to the candidates a comprehensive information and knowledge regarding particularities of the cybersecurity-related awareness programmes.

### Purpose of Course

Cybersecurity awareness training is a formal process for educating employees about digital security. A good security awareness program should educate employees about threats, vulnerabilities, corporate safeguards, policies and procedures as well as the basic ‘cybersecurity hygiene’. The purpose of this course is to instruct the candidates of how to build such an effective, tailor-made programme.
